Osborne Park · Malaga

The better way to trade.

Family owned and operated in Western Australia for more than 50 years, Regal manufactures precast concrete products and supplies plumbing hardware and bathroom, kitchen and laundry selections to builders, plumbers, designers and renovators. Now ISO 9001:2015 certified, we tender on civil and government projects while staying focused on the residential clients who built our business.

regal concept design

SELECTIONS SHOWROOM

A purpose-built Osborne Park showroom with one-on-one consultations for bathroom, kitchen and laundry selections.

OUR STORY

Five decades of local manufacturing and supply

Regal Cement was founded in 1973 and has been family run ever since. What began with small concrete products has grown into a broad range of precast concrete for the residential building market, a trade supply business and a design showroom.

At every stage we have reinvested in our infrastructure to keep pace with customer demand. New machinery and streamlined processes have grown our customer base, built on quality products and exceptional service.

The Regal team — family run since 1973.

Milestones

1973

Founded

Regal Cement opens as a family business producing small concrete products, then expands into a larger precast range for residential builders.

Early 1990s

Hardware supply

We expand into hardware supply, catering to builders of all sizes and broadening our offering to local plumbers.

Early 2000s

Modernised production

State-of-the-art Italian mixers and batching equipment cut production times, and our production area is rebuilt to meet silica regulations.

2016

Osborne Park showroom

A purpose-built concept showroom and warehouse opens, serving builders, designers, renovators and plumbers.

2017

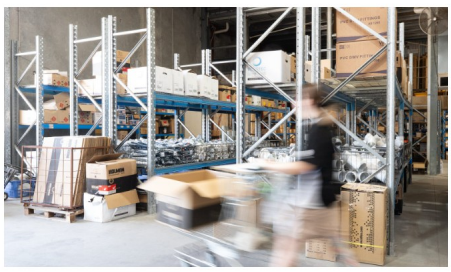
New soakwell machine

A new soakwell machine imported from Italy lifts both product quality and production rate.

2025

ISO 9001:2015

Certification opens tendering on civil and government projects, and the new Regal website brings our capabilities together online.



HOW WE WORK

Core capabilities

01 Strategic improvement

Open lines of communication between our manufacturing team and suppliers let us keep improving our products and the raw materials that go into them. We look to precast manufacturers worldwide and test what suits the Australian residential market.

02 Research & development

R&D has always been part of how we manufacture. Over the years, constant refinement has cut manufacturing times and improved product quality.

03 Problem solving

When problems arise, our well-trained staff step in so customers are never burdened. Our prompt, polite response is consistently appreciated by our clients.

04 Quality products

Fifty years of precast manufacturing experience stands behind every product. Our focus is shorter manufacturing times and higher output, without compromising quality.

05 Ownership

We supply our own precast products alongside those made by our valued merchant partners, so we can cater to every customer's needs, from a single fitting to a complete project, across every branch.

06 Culture

Our 50+ staff come from many ages and cultural backgrounds, and that mix inspires and teaches the whole team. Everyone is treated like family, and their hard work is valued.

07 Customer satisfaction

Customers are the cornerstone of our business. We seek their feedback, meet agreed timeframes so projects continue without delay, and respond to enquiries round the clock.

Customers first, for more than 50 years.
